

# AescuPlast K-Taping

Curative taping technology.

NorthAid K-Taping has a comprehensive array of therapeutic benefits and is able to provide you with pain relief and muscular support to help control body parts affected by muscle inhibition.

## Application

It is applied on and around an injury and works by moving the skin and connective tissue away from the injured area, allowing lymphatic fluid to flow freely and heal the inflamed tissue.

## Advantages

- + Relieve pain or fatigue felt in the muscle and prevents cramping
- + Promotes and improves blood and lymphatic circulation
- + Increase the range of motion in your joints and loosen your muscles
